

Task 6 - Sales Trend Analysis Using SQL

Objective

Analyze monthly revenue and order volume using SQL queries.

Dataset

Online Sales Dataset containing transaction details, revenue, product category, region and payment method.

SQL Operations

SELECT, GROUP BY, ORDER BY, SUM(), COUNT(), AVG(), LIMIT and STR_TO_DATE().

Key Analysis

Monthly revenue, monthly order volume, product-wise revenue, region-wise revenue, payment method analysis and highest revenue transaction.

Conclusion

SQL aggregation techniques were used to identify sales trends and summarize business performance.
